

# It's All About What You Don't See

How does this NEW technology benefit you?

- Year to year comparison of photos to monitor progression
- Can detect the eye diseases shown here, and others too
- May eliminate the need for dilation

Dr. Carroll, Dr. Lahiff, Dr. Swalla and Dr. Wells  
highly recommend OPTOS today as part of your yearly exam

Every five seconds one person in the world goes blind.

A child goes blind every minute.

80 % of blindness is avoidable

(60 % detectable, and only 20 % preventable).

More than 2.2 million Americans over 40 years old  
have glaucoma, yet more than half are unaware they have  
this disease until their sight is entirely compromised.  
Blindness is the # 1 complication of people with diabetes.

**Vision insurance plans provide you with the basic  
vision examination coverage, but do not  
always include advanced disease detection  
procedures like retinal photography.  
The fee for this extended exam is only \$48  
and is due at the time of service.**

USING THIS NEW  
TECHNOLOGY  
WE CAN SEE:

Normal Healthy  
Retinal Image

A Retina Affected  
with Diabetes

A Retina Affected  
with Cancer

A Retina  
Affected with  
Macular  
Degeneration

- ☐ Yes I want to take advantage of this new advanced technology
- ☐ I am not sure and want to speak with my doctor
